

Seed Cleaning Plant Defeated Again

Once more the ratcatchers of the MD of Wainwright have turned down the bylaw providing for the expenditure of monies necessary for the establishment of the proposed seed cleaning plant. Out of the whole area, affirmative votes were registered at only four polls—Geo. Turnbull's, the Municipal office, Plaxtonville School and Pashendale School. All other polls turned down the project with varying degrees of emphasis.

The vote by polls was as follows:

Ribstone Curling Rink	4	37
Keith's Office, Chauvin	4	64
Dr.'s Office, Edgerton	24	68
Geo. Turnbull's	7	6
Municipal Office	201	23
Rose Hall	2	29
Rosedale Hall	10	14
Plaxtonville School	11	2
Rassendale School	10	2
Legion Hall, Irma	22	44
Fulview School	1	6
Total	296	295

Two spoiled ballots at Edgerton. The 2/3 majority vote required would have called for 394 votes in favor of the by-law. As only 296 favorable votes were cast, this was 98 short of the required number.

EDMONTON REPORT

By Donald F. Smith

EDMONTON — Tractor-ups appear to be the major cause of fatalities resulting from tractor accidents, according to a survey made by the National Safety Council of the U.S. and published in its 1953 book on all types of accidents.

Percentages of the various types of tractor accident deaths were compiled from the records of five states during periods that varied from 11 to one year. It is a good bet the percentages hold true, but slight variations, for Alberta. They are based on 1,037 deaths that occurred from tractor operations during different lengths of time in the five states.

Tractors overturning accounted for 55 percent of the fatalities while the next danger to guard against is falling from the machine, which claimed 16 percent of the lives. Another eight percent of the 1,037 lives lost occurred when persons were crushed between tractors and other obstacles. Three percent are listed as being "entangled" while other accidents accounted for the remaining 13 percent.

Several times in past years U.S. citizens, some of them statesmen of varying degrees, have suggested proposals of marriage between their nation and Canada. The latest is contained in an article published by a Denver newspaper's Sunday supplement, written by Oregon's author-senator, Richard L. Neuberger, under the title "Wedding with Canada."

The term "wedding" itself should suggest a great deal of caution. Like man and woman, nations can be great friends. Then they tie the knot in the bonds of matrimony and the result is not always one, but happy family.

Remembering the U.S. divorce rate one also wonders what might happen after the glamour of Canada's vast natural resources is depleted.

Remember the proposal of one Timothy Patrick Sheehan, who in January, 1952, a newcomer to the U.S. congress, suggested the possibility of the U.S. purchasing Canada from Great Britain for around \$9 billion. Temperatures of Canadian soared.

At that time it was recalled that the fear of annexation by the young but brash United States of America resulted in Canadian Confederation in 1867.

But Neuberger doesn't see any cause for concern, pointing out that individual states below the 49th Parallel, have not lost their identity or sovereignty. But he forgets that the individual states do not see their own national income taxes, which in comparison with Canadian income taxes are much higher. Nor do they set the cost of living, which in the matter of such essentials as food and shelter (the latter in climates comparable with most of Canada) also is higher than in this nation.

A map which accompanies the article has the legend "Raw Materials" drawn out across the face of Canada along with oil derricks, mine shafts, cattle and coyotes, while across the face of the U.S. is the word "Factories."

The suggestion of the map and article is that the U.S., whose natural resources are being depleted, played out in some instances, could process Canada's raw materials in its factories. Assembly-line methods and the elimination of the tariff wall with the removal of the international boundary, the author suggests, would mean lower prices for many goods for Canadians.

Here again a knowledge of what is taking place in Canada is handy. Processing plants, many of them built by American capital, are being erected in Canada on the doorstep of the resources. So far they are processing such things as natural gas and wood products into primary products, but economists foresee the time when subsidiary industries will be established alongside the primary producers to turn out finished products at the prices of many manufactured articles are expected to drop for the Canadian consumer. There doesn't seem to be any advantage in shipping the raw materials to the plants of eastern states when they are being established in Canada.

Neuberger likes Canada and the U.S. to ham and eggs—they go together, he says. Which is the ham?

Glen-Coa Gleanings

Congratulations to Rev. and Mrs. H. C. Sains of Vancouver on the birth of a son, Jonathan Curtis, on August 1.

Our congratulations also go to Ling whose marriage took place at Calgary on August 5. During his absence on Sunday, August 9, the service will be taken over by the W.A. and the Sunday School Service at 11 a.m. We hope to see the church filled for this occasion.

Mr. and Mrs. Ambrose Firkus and boys are back home again after enjoying a months holiday with Mr. Ambrose' mother at Steven's Point, Wisconsin.

Serious Hail Damage Throughout Alberta

About five per cent of Alberta's seeded grain acreage has been seriously damaged by hail. Last week Glen Elder chairman of the Alberta Hail Insurance Board, estimated that over 500,000 acres had suffered extensive damage and since that time number of serious storms have been reported.

Some of the more recent storms were reported as follows: On July 14, the area from Ardley and Haynes through Alix, Mirror, Meek, Creek, Dayland, Strome, Viking, Innisfail, Minburn and Derwent, with damage to some 200,000 acres; the Bindloss-Alsask area damaging at least 10,000 acres; Lousana to Erskine and Stettler oh 15,000 acres; Penitosh to Bruce, Acme; Linden; Wimbome; Clive; Bruderheim; Beaverlodge. On July 18th a severe storm moved through Balzac Strathmore, Gleichen, Bassano, Brooks, and Irvine, destroying a strip five miles wide; on July 19 a less severe storm hit the Olds, Trochu and Huxley area, with local storms at Makepeace, Buffalo, Della, Hussar and Jarrow. On July 23 at Rosebud, Okotoks and Cremona; on July 26 at Penhold; on July 27 the Medicine Hat area and at Champion.

Celebrate Golden Wedding Anniversaries

On the golden anniversary of their wedding day, Mr. and Mrs. S. Congdon were honored at a reception in their home, arranged by their children.

Mr. and Mrs. Congdon were married at Campbellville, Ont., in 1903 and moved to Edmonton in 1907 where they resided until they moved to the Irma district in 1931, where they have lived for the past 32 years.

Out of town guests at the reception included Mr. and Mrs. Chas. Congdon, Mr. and Mrs. Jack Congdon and daughter, Mr. and Mrs. Clinton (Bud) Congdon and daughters, Mr. and Mrs. Dale (Buster) Congdon and son and Mr. Percy Congdon, all of Edmonton; Mr. and Mrs. S. Fuglem and children of Kessler, Alberta, and Mrs. Eva Alkinson and son of Seaman, Sask. Also present were Mr. and Mrs. Sam Congdon and family and Mr. and Mrs. Ralph Congdon and family of Irma.

The gathering included seven children, fourteen grandchildren, and three great grandchildren, and was the first time the entire family had been reunited since 1921.

For the occasion the house was decorated in gold and white and a three tier wedding cake was flanked by gold candles, as the guests of honor and the immediate family took their places at the dinner table.

Mr. Bud Congdon, the first grandchild, proposed the toast in a very fitting and able manner, and on behalf of the family presented the couple with a lovely chrome kitchen suite for their new home.

The occasion was further marked by a telegram of congratulations from the Prime Minister of Canada Mr. Louis St. Laurent and a citation from Premier Manning of the Province of Alberta, besides many other complimentary cards and greetings.

Mr. and Mrs. A. W. Burton who were married in London 50 years ago celebrated their Golden Wedding here this week.

On Sunday last group of 30 relatives and friends held an Anniversary dinner at the home of Mr. and Mrs. Ted Thurston.

The table was centred with a three tiered wedding cake trimmed in white and gold and a presentation of a combination radio and gramophone was made to Mr. and Mrs. Burton.

Mr. and Mrs. Burton are real old timers here for they came to Edmonton in 1905 and then on to Irma in 1906. They have been living at Vancouver for the last few years but as they were visiting here with their children on this happy occasion their many friends, and neighbors wanted to honor them too.

So on Monday evening a large group of old timers gathered in Kiefer's Hall and when the bride and groom of 50 years were ushered in, Mrs. Bert Long began to play the wedding march and they were escorted up the hall.

With Mr. J. Jackson as master of ceremonies the party was soon off to a good start. He called upon Mrs. Smallwood, Mrs. Fischer, Mr. Wm. Barber, Mr. Wm. Masson and Mr. W. H. Prior and Mr. F. C. Wiese and they each in turn recalled lively reminiscences of pioneer days at Irma when Mr. Burton was a member of the agricultural society, the school board and the municipal council. An enjoyable contest was then held and this was won by Mrs. L. Thurston.

Mrs. J. C. McLean on behalf of the old friends presented Mr. and Mrs. Burton with a beautiful tea set in gold and rose china.

A bountiful lunch was then served.

Card of Thanks

Our sincere thanks to all our relatives, neighbors and friends who made our 25th anniversary such a pleasant occasion. We appreciate the gifts and good wishes very much.

Voters on August 10th Federal Elections MUST USE an "X"

"I'd like to say this to all Canadians..."

UNDER a Liberal government, Canadians have added every year to the national strength and national unity of Canada;

We have had the greatest expansion of social welfare in our history;

We have increased our employment, our production and our national income every year;

We have had the greatest expansion of our primary and secondary industries — truly an industrial revolution;

Because of the outstanding contribution of the members of our Navy, Army and Air Force, we have been able to do our full share to prevent and to stop Communist aggression;

We have reduced the national debt every year, and, in the last two years, reaped the reward in lower tax rates.

Do we want all that to be continued?

Do you really think it's time for a change?

For a change to a Parliament of regional groups — a handful of Social Crediters from the Far West, a few Socialists from the Prairies, a few more Conservatives from Ontario or the Maritimes and some so-called Independents from Quebec?

In such a Parliament without the leadership and responsibility of a united national party, how could the government help being weak and insecure?

Do we want a weak and divided government to deal with the formidable problems of the next few years? I ask you, IS it really time for a change?

We believe most Canadians want a government which encourages enterprise, promotes trade and fosters the exploration and development of our resources; and you know it as well as we do, that requires balanced budgets, paying off debts in prosperous times and a tax structure which, while fair to all, is adequate to meet these demands.

Special Permits Regarding Game Bird Shooting

Farm crops in Alberta will have greater protection from ducks and other migratory water fowl this year as the result of new regulations announced by the Department of Lands and Forests.

Three types of permits are now available for securing or killing ducks in areas where they are causing extensive damage to crops previous to the opening of the hunting season. These include an individual permit for killing migratory birds; a general area permit for securing birds; and a general area permit for killing birds.

Heavy rains during the last two years have accounted for a substantial increase in the number of ducks in Alberta with the result that the old regulations were inadequate to meet the situation. The new crop protection regulations were prepared after careful study by the Federal Government and the Prairie Provinces.

One of the main differences in the regulations is that responsibility for the issuing of permits to farmers has been transferred from the Federal to the Alberta Government. Permission to shoot or secure unwanted water fowl now can be obtained without waiting for approval from Ottawa. Another revision eliminates the restriction of seven helpers to one killing permit.

The individual permit is issued by a Game Officer or the RCMP to any person owning, leasing or residing on a farm less than 1,280 acres in size. This permit allows the farmer and any of his employees to kill ducks and geese damaging his crops.

The general area permits are issued by the Fish and Game Commissioner where individual permits cannot successfully cope with the number of migratory birds damaging crops. The areas covered by the permits are specified by the Alberta Government and include those where crop damage is particularly heavy.

The securing permit allows any resident of Alberta to use firearms for securing birds within a specified area. If this method is not successful a killing permit may be issued, allowing any resident of Alberta to shoot migratory birds within the area.

In order that farmers may be protected against overzealous hunters, the Game Act prohibits the shooting on any posted land without the consent of the owner. In addition, the Criminal Code of Canada allows the owner to remove any persons who may be trespassing on his land.

In announcing the new regulations, the Department of Lands and Forests stated that blinds, decoys, duck or goose calls cannot be used, and the shooting within 50 yards of any water area is prohibited. Also, the actual shooting of migratory birds is limited to fields where agricultural crops, either standing or cut, are found. This does not include stubble, summer-fallow or pasture land.

This announcement is hailed with delight by the juvenile element, while some of the "older boys" are already looking about for their neighbor's nephews and nieces. They are saying they will probably have to go and take the children to see the Wallace & Clark Wild Animal Circus but deep down in their hearts they know they would not miss the circus if there was not a small boy within a thousand miles of Viking, on circus day, August 10. Many new and novel features will be presented this season by the Wallace & Clark Circus, daring and intrepid aerialists, acrobats, wire walkers, dainty equilibrists, funny clowns, performing ponies, high school and liberty horses, ponderous elephants. Animals from all parts of the world are on exhibition with the Wallace & Clark Wild Animal Circus, including a giant hippopotamus from the river Nile, which is alive and weighs over four tons.

MORE FARMERS USE marvelube GREASE "0" and "1"

Marvelube is a tacky, gun grease, formulated to cling to metal surfaces. It's soft enough to be forced through closely fitted machinery parts yet it has enough body for full protection.

Marvelube grease is the accepted standard of high quality among Western farmers. Regular servicing with Marvelube Grease "0" when it's cold—Marvelube Grease "1" when it's hot, cuts wear to minimum—prolongs farm equipment life.

See your IMPERIAL OIL agent.
